- Retrofit option to existing systems available
- Plinth, pump, wall, tank and bowser mounting options
- Automated, real time alarms by SMS Messaging for fuel theft or system misuse
- Integrated pump options – single or dual display

Jigsaw Fuel Management - The Eclipse Web Based Solution

Web Based Fuelling Information

- Access to data from any web enabled PC or phone, using a secure login facility.
- Only standard web browser required – No system specific software to install or maintain on site.
- Additions and amendments have immediate effect at all fuelling locations in your network.
- No daily polling of fuel island terminals to manage – minimum daily support.
- Software updates and enhancements managed centrally, removing the need for expensive site visits.
- Unique quick view gives simple summary of entire network.
- True multi user system giving local and/or central data management and reporting.
- Seamless integration with vehicle tracking systems.
- Seamless data export to fleet management software.
- Web based fuel card data import.

Just some of the benefits

- As the system is linked directly via GPRS from the fuel island to the web site, there is no need for daily polling- all information is updated as it happens.
- Live Information gives enhanced security.
- All fuelling data displayed immediately on the Internet.
- Stock figures are always current (links to tank gauge).
- Immediate low stock.
- Immediate notification of pumps being disabled.
- Immediate notification of attempted use of blocked or stolen keys.

Cameron Forecourt is the UK's leading company for the supply and maintenance of commercial vehicle refuelling systems.
